Ultra Zip Compressor
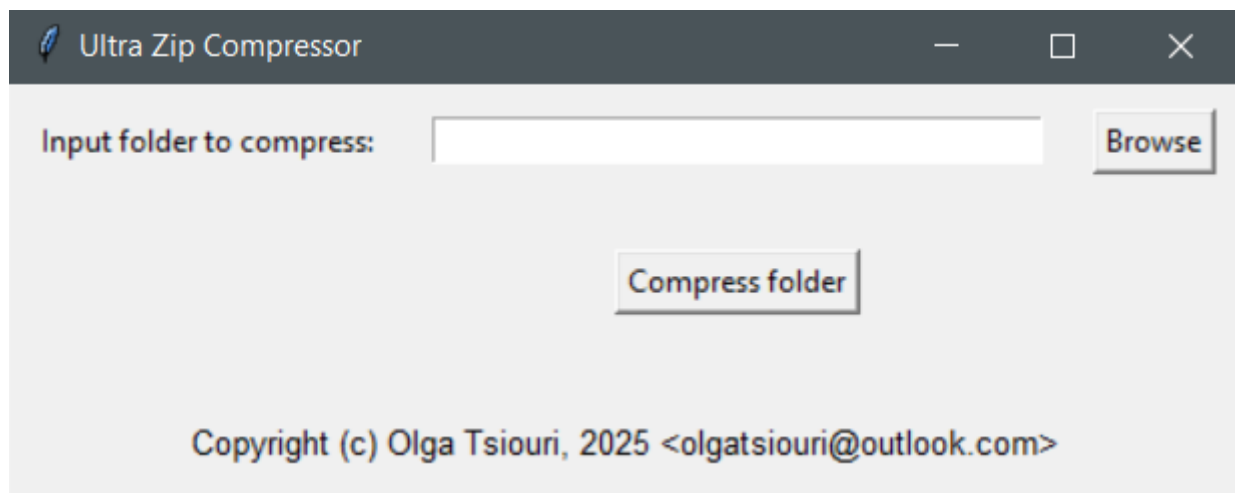

Windows x86_64 GUI WinRAR wrapper to ultra compress a folder to a zip archive

Installation

- Install WinRAR.
- Open the installer, select and make note of the folder destination you will install WinRAR. Leave the rest of installation options as default.
- Right click the start button and select System -> Advanced system settings -> Enviromental Variables
- In the User enviromental variables panel create or edit an anenviromental variable named Path and add the folder destination where you installed WinRAR.
- After doing that click OK on all windows.
- Download the file from this repository's bin folder

Usage

- Browse or paste the destination to the input folder.
- Click Compress folder.
